# Handover Document

## Stoney Tiger Club NFT

Stoney Tiger Club will stay operational in development over the course of its release post Summer 2022. Both Luke Allisstone and Alex Wardle will remain head developers of the Website's progress. In order to develop the site further, prerequisites are required to develop the minting and website further:

- Basic Knowledge of HTML 5 and CSS
- Basic Knowledge of JavaScript and Next.js
- Basic Knowledge of Sanity.oi

With basic knowledge of these prerequisites, further development of the site should be capable.

## Adding future files and features

To add additional files to the page, follow these steps:

(These files will be on firebase when finished however for example I will show you how to do it on a loci server)

Navigate to assets or components and open it within a coding software ie Visual Studio Code.

When within your coding software, add a new file within the folder and you can now you're your own custom files. Sanityclient.js connects the app to the backend.

When changes have been complete, you may have to upload the files into sanity.io and they will automatically upload to the hosting space.
